

## Globes and Reflectors For the Best Results

If your chief consideration is a perfect decorative scheme, or if your aim is to attain highly efficient and scientifically correct illumination, you will be able to accomplish it best with "Phoenix Quality" Glassware. "Phoenix Quality" is the result of over thirty years of progressive globe making, and a steadfast, ever-uppermost determination to produce the best. The use of "Phoenix Quality" Glassware in most of the prominent buildings everywhere demonstrates its success.

There are over fifteen thousand different designs in "Phoenix Quality," and as they are made in all sizes and for all kinds of lamps, there is an excellent style for your use for every occasion. Try "Pheno" Tungsten Reflectors for a pleasing, well-diffused light and strong illumination. Use some of the beautiful cut glass, etched or artistic colored decorated globes where glassware is desired, that will give pleasure through all the years it will be in use. 10,742 Pheno Ball gives daylight illumination.

No doubt you never have heard of us before, and we are not desirous of advertising ourselves, but we wish to show our appreciation for the success of the E. F. BROOKS CO., Inc., for their success is founded on the fact that they give the best value for the smallest money, and this is our byword.

Were we to praise or to extol the wonderful success of the E. F. BROOKS CO., Inc., we could not do justice, no matter how hard we tried; therefore our congratulations and best wishes are that for the next forty-five years their "oak tree" will outgrow all their rivals, and we, on our part, will endeavor to do our share, for "we are growing."
